Department of Geography  
Report of Group Discussion

Date: 12/10/2023

- 
- **Participants** : FYBA (Div B) students - 12 in total, divided into 3 groups
  - **Topics** :
    - 1) Interior of the Earth
    - 2) Wegner's Continental Drift Theory
    - 3) Davis's Erosion Cycle
  - **Objectives** :
    1. Assess program and course attainment of the Lithosphere topic in the syllabus.
    2. Gather and discuss additional information on the specified topics.
  - **Summary** :

The Department of Geography organized a Group Discussion on 16<sup>th</sup> September 2023, focusing on key topics related to the Lithosphere (Second topic of curriculum). A total of 12 FYBA (Div B) students actively participated, forming three groups with four students each.

The primary objective of the discussion was to evaluate the program and course attainment, particularly emphasizing the Lithosphere section of the syllabus. This allowed the department to gauge the students' comprehension and engagement with the subject matter.

Furthermore, the group discussion served as a platform for students to share and discuss additional insights on specific topics, namely the Interior of the Earth, Wegner's Continental Drift Theory, and Davis's Erosion Cycle. This approach aimed to foster a deeper understanding of the subject matter and encourage collaborative learning among peers.

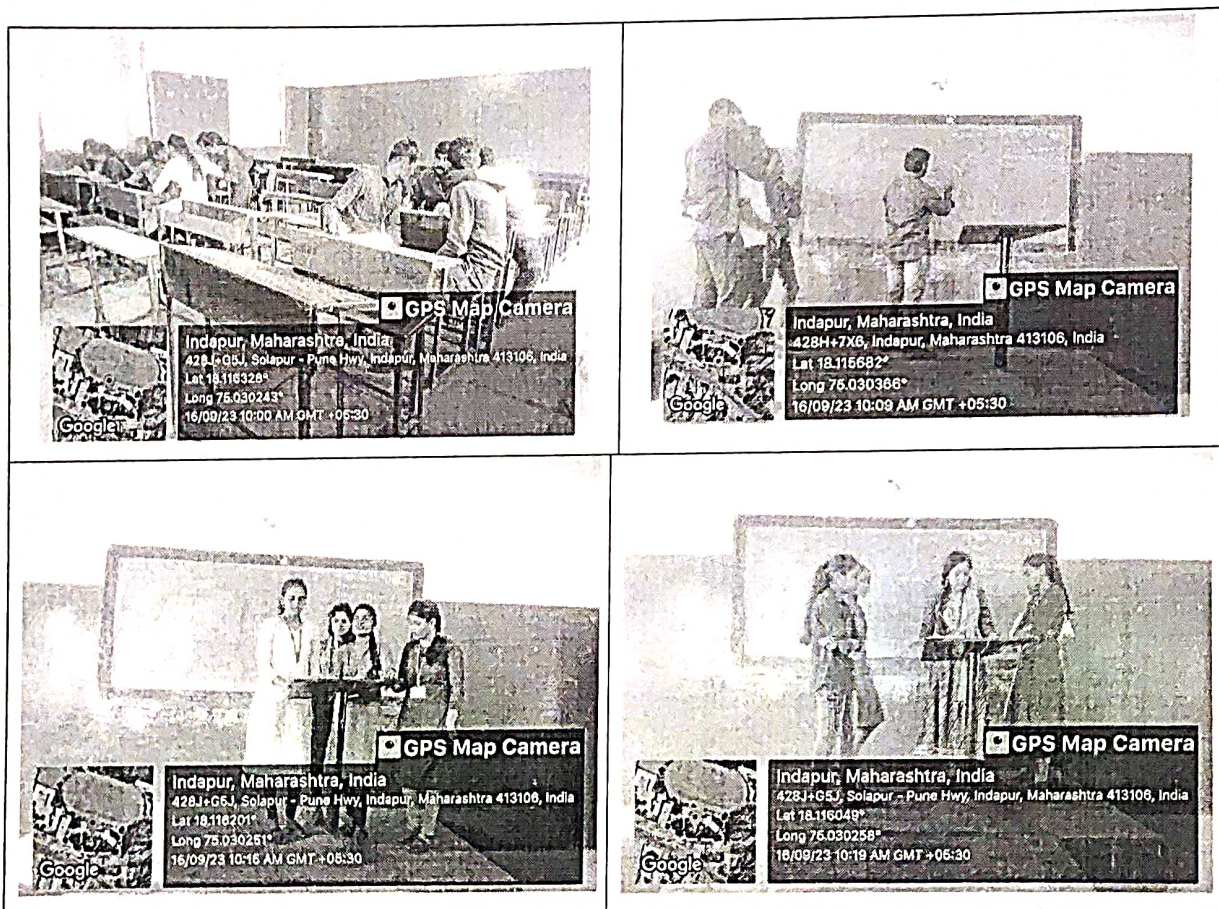

The event was successful in promoting active participation and knowledge exchange among the FYBA (Div B) students. The Department of Geography looks forward to organizing more such interactive sessions to enhance the overall learning experience for students.

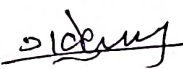

Students submitted their feedback on group discussion. Most of the students gave positive feedback. Some of the students suggested that duration for this activity should be more.

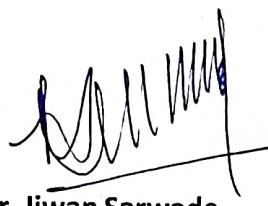

• **Conclusion** :

The Group Discussion on 16<sup>th</sup> September 2023 was a valuable initiative to assess and enrich the understanding of key topics within the Lithosphere domain. The active participation of students and the exchange of additional information contributed to a vibrant learning atmosphere. The Department of Geography remains committed to facilitating such engaging sessions for the continuous improvement of students' academic experience.
